Advantage GO | Ingestion

DIGITISE DATA IN SECONDS

Our mission is to help Insurers eliminate time spent on the tedious task of digitising documents and dissolving Underwriter admin overhead.

With the continuous rise in the volume and format of data to analyse, Insurers and their underwriting teams need to quickly and accurately evaluate high volumes of data delivered through various channels - if they are to stay relevant and competitive in today´s volatile economy.

Ingestion provides an out-of-the-box, advanced data ingestion tool for digitising unstructured documentation straight from a user´s inbox. Installed, implemented and deployed in seconds, data can be rapidly ingested at the click of a button.

SET UP ONLY TAKES AROUND A MINUTE

With no implementation overhead, no coding requirements whatsoever, and with ingestion of some documents taking less than 60 seconds. AdvantageGo Ingestion can be seamlessly integrated with existing services, making returns of your investment instantaneous.

AdvantageGo Ingestion is offered as a fully managed solution affording our customers access to innovative artificial intelligence functionalities without the need for data scientists making next-generation digitisation tools accessible to all within the marketplace.

Significantly boost efficiency and increase Underwriter output exponentially. With Ingestion by AdvantageGo, you are able to reduce Underwriter overhead by an estimated 25% and massively reduce data entry overhead costs.

Digitise data simply, efficiently, and elegantly from most document types into structured data for standalone integration or visualised directly into AdvantageGo's workbench, exposure management platforms, and PAS products. Our AI-powered engine automatically extracts and converts data from a variety of industry standard document structures.

AdvantageGo Ingestion utilises a powerful global AI model, which means that with every ingested item, the tool becomes more competent and more accurate. Users realise the benefits of the product from the very first ingested document right through to the last, giving an instant return on the low per user per month investment made.

From broker to workbench within 60 seconds, increase data accuracy and integrity while outperforming industry peers through greater business insight with our suite of compelling KPA's, KPI's, Insights, and analytics which are all surfaced straight to your inbox and accessible via our cloud-based management console.

NO CODE, LOW COST, INSTANT RESULTS

HYPER-OPTIMISE YOUR UNDERWRITING
WITH INGESTION + UNDERWRITING

Digitise straight to AdvantageGo Underwriting or extract as a structured JSON file for connection to your internal systems.
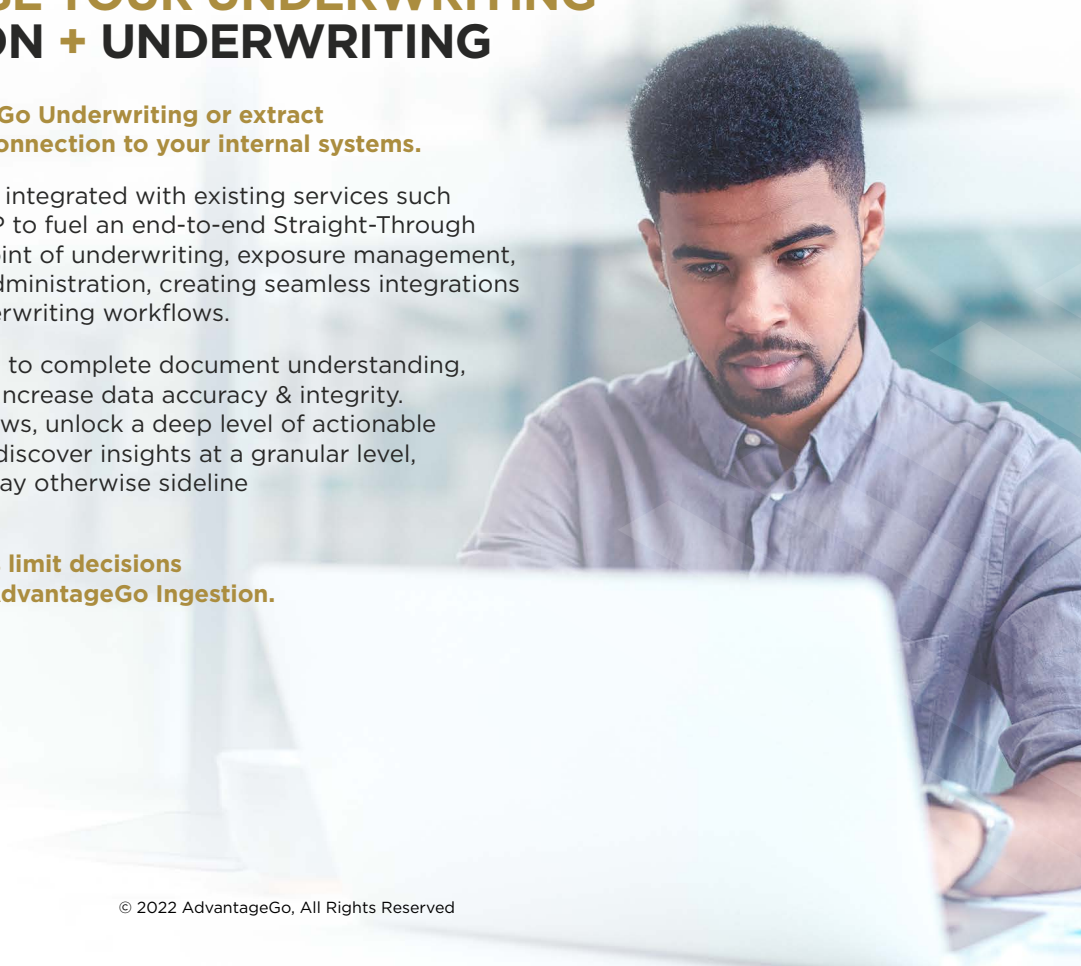

AdvantageGo Ingestion can be integrated with existing services such as legacy core software, or ERP to fuel an end-to-end Straight-Through Process for use cases within point of underwriting, exposure management, customer service, and policy administration, creating seamless integrations across the totality of your underwriting workflows.

Reduce processing time thanks to complete document understanding, eliminate manual analysis, and increase data accuracy & integrity. Automate data-intense workflows, unlock a deep level of actionable data from all relevant sources, discover insights at a granular level, and eliminate processes that may otherwise sideline critical information.

Don't let process requirements limit decisions – see the bigger picture with AdvantageGo Ingestion.
